ACTIVITY	DESCRIPTION	QTY	RATE	AMOUNT
Integrated Suspension Tracking Rail System - (Universal Conversion Kit)	Our Universal Conversion Kit is engineered to seamlessly upgrade most universal exercise units on the market. This versatile system features a premium center-mounted tracking rail that allows patients in a therapy suit to glide smoothly along the length of the unit. Designed to enhance mobility and support advanced therapy techniques such as gait training, walking therapy, and core strengthening, this kit improves both patient engagement and safety. Transform your existing unit into a more functional and dynamic rehabilitation tool with our easy-to-install universal solution.	1	1,623.60	1,623.60
Universal Exercise Unit - Accessories	The Summit Flex: Universal Exercise Unit Accessory Kit is the essential companion for maximizing the function, adaptability, and therapeutic impact of your Summit Flex UEU. Whether you're building a new therapy setup or expanding an existing program, this all-in-one kit includes the tools and attachments you need to deliver dynamic, full-body interventions across all ages and ability levels. With components crafted for durability, comfort, and clinical-grade performance, the accessory kit empowers therapists to target strength, range of motion, motor control, postural stability, and more—all while promoting safety and engagement.	1	2,469.99	2,469.99
